

BBC Radio International Blue Planet II: The Podcast 2017

BBC Radio International is delighted to offer licencing of the 'Blue Planet II: The Podcast', which is produced by the BBC Natural History unit where 'Blue Planet II' television hit series was produced.

The presenters of the 'Blue Planet II: The Podcast' talk to producers, cameramen and scientists about the best stories from their experience of filming the 'Blue Planet II' – people who came face to face with the fish.

The 'Blue Planet II: The Podcast' has something for everyone in the ocean: there is beauty for the artists, there is adventure for the bold, there are mysteries for the scientists - the sheer wonder that is all below the ocean surface. The 'Blue Planet II: The Podcasts' also talks about the breakthroughs in marine science and cutting-edge technology to explore new worlds and reveal the very latest discoveries.

This landmark series will introduce listeners to compelling contemporary stories from the ocean - in the words of Sir David Attenborough, the series '... brings us a new understanding of life beneath the waves'.

The Podcast version of the 'Blue Planet II' is a seven part series, and is released weekly right after the show finishes on BBC 1. See description of released part to date below. This catalogue is updated weekly on release of each episode.

Duration of each episode is between 30-35 minutes.

To audition the programme, listen to 'Blue Planet II: The Podcasts' here:

Episode 1: Trevallies & Tuskfish

The first episode introduces listeners to bird-chomping Trevallies, and talks about the trials of the Tuskfish, plus a whole lot of other marine facts.

Episode 2: Sixgills and Submersibles

The presenters, Becky and Emily go deep deep down into Episode 2, with leaky subs, hungry sharks, and a deep-sea coral that's older than you can imagine.

Episode 3: Cityscapes & Cephalopods

Sir David guides us through the mean streets of the coral metropolis, with colour-changing cuttlefish and his favourite: the curious clownfish.
